The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3692

### **DETAILED ACTION**

1. Claims 100-232 remained pending.

# Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 100-232, are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Applicant's claims are directed to an algorithm. Specifically, claim 1 recites "ESTABLISHING CONNECTION", "RECEIVING DISPLAY" and "SENDING INSTRUCTIONS"DISPLAYING", however these steps are mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, for example) and abstract ideas without a practical application are found to be non-statutory subject matter. Therefore, Applicant's claims are non-statutory as they do not produce a useful, concrete and tangible result.

## Claim Rejections - 35 USC § 102

- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
- A person shall be entitled to a patent unless —

  (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 100-232, are rejected under 35 U.S.C. 102(e) as being anticipated by Kemp, II, et al (Hereinafter Kemp II U.S Patent 6, 766, 304).

As per Claims 1000-232, Kemp, II discloses an interactive grid-based graphical trading system for use by any trader, where the system comprises a grid-based

Application/Control Number: 09/897,437

Art Unit: 3692

graphical interface, said graphical interface being adapted to establish connections with any backend system;

wherein said interactive grid-based graphical trading system is adapted to receive and display market trading data received from said backend system;

wherein said interactive grid-based graphical trading system includes first process means that function to send transaction instructions to said backend system, and to receive messages and market trading data from said backend system; and wherein said grid-based graphical interface includes second process means that function to receive, process, and display said market trading data, and said messages. (note abstract and see column 5 lines 29-32 and column 3 lines 15-24 and Fig 1)

wherein said market trading data includes information chosen from the group of market trading data consisting of: order data of said trader, and quote data for any selected security or group of securities;

wherein said interactive grid-based graphical trading system includes third process means that function to transform said market trading data into a graphical representation for display on a display device, wherein said graphical representation includes at least one grid having a plurality of cells arranged in a matrix chosen from the group consisting of: a plurality of rows and at least one column, and a plurality of columns and at least one row;

wherein a row is an arrangement of horizontally adjacent cells with at least one common property, and a column is an arrangement of vertically adjacent cells with at least one common property, and wherein each cell within the said plurality of cells belongs to one row and one column. (Fig 3 see column 5 lines 29-31 and column 3 lines 15-24) wherein said plurality of rows or said plurality of columns are associated with a price axis representing a range of prices, wherein said range of prices is associated with the trading price range of any given security;

wherein any cell may be associated with said market trading data, and contains a graphical representation of said market trading data (see column 4 lines 65-66 and column 8 lines 16-36 and column 7 lines 54-64 and column 8 lines 16-36 and column 5 lines 29-31)

Art Unit: 3692

wherein each cell along said price axis indicates a price or price range for which said market trading data exists, and the other of said at least one column or said a least one row is indicative of a specific criterion chosen from a plurality of criteria within which said market trading data may be categorized; and

wherein said any trader can place, or modify, an order for a selected security or group of securities, over which that trader has discretion, by interacting with said grid-based graphical interface. (Fig 3 see column 5 lines 29-31 and column 3 lines 15-24 and column 4 lines 65-66 and column 8 lines 16-36 and column 7 lines 54-64 and column 8 lines 16-36 and column 5 lines 29-31)

### Conclusion

## **RESPONSE TO ARGUMENTS**

- 4. Applicant arguments filed 4/9/2007 has been fully considered but they are moot inview of new grounds of rejections.
- 5. Applinant's claims 100, 150, states "adapted to establish connection, system adapted to receive"

However the subject matter of a properly construed claim is defined by the terms that limit its scope. It is this subject matter that must be examined. As a general matter, the grammar and intended meaning of terms used in a claim will dictate whether the language limits the claim scope. Language that suggests or makes optional but does not require steps to be performed or does not limit a claim to a particular structure does not limit the scope of a claim or claim limitation. The following are examples of language that may raise a question as to the limiting effect of the language in a claim:

- (A) statements of intended use or field of use,
- (B) "adapted to" or "adapted for" clauses,
- (C) "wherein" clauses, or
- (D) "whereby" clauses.

This list of examples is not intended to be exhaustive. See also MPEP § 2111.04.

\*\*>USPTO personnel are to give claims their broadest reasonable interpretation in light of the supporting disclosure. In re Morris, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir. 1997). Limitations appearing in the specification but not recited in the

Art Unit: 3692

claim should not be read into the claim. E-Pass Techs., Inc. v. 3Com Corp., 343 F.3d 1364, 1369, 67 USPQ2d 1947, 1950 (Fed. Cir. 2003) (claims must be interpreted "in view of the specification" without importing limitations from the specification into the claims unnecessarily). In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-551 (CCPA 1969). See also In re Zletz, 893 F.2d 319, 321-22, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989) ("During patent examination the pending claims must be interpreted as broadly as their terms reasonably allow.... The reason is simply that during patent prosecution when claims can be amended, ambiguities should be recognized, scope and breadth of language explored, and clarification imposed.... An essential purpose of patent examination is to fashion claims that are precise, clear, correct, and unambiguous. Only in this way can uncertainties of claim scope be removed, as much as possible, during the administrative process.").<

Where an explicit definition is provided by the applicant for a term, that definition will control interpretation of the term as it is used in the claim. Toro Co. v. White Consolidated Industries Inc., 199 F.3d 1295, 1301, 53 USPQ2d 1065, 1069 (Fed. Cir. 1999) (meaning of words used in a claim is not construed in a "lexicographic vacuum, but in the context of the specification and drawings."). Any special meaning assigned to a term "must be sufficiently clear in the specification that any departure from common usage would be so understood by a person of experience in the field of the invention." Multiform Desiccants Inc. v. Medzam Ltd., 133 F.3d 1473, 1477, 45 USPQ2d 1429, 1432 (Fed. Cir. 1998). See also MPEP § 2111.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clement B Graham whose telephone number is 703-305-1874. The examiner can normally be reached on 7am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hyung S. Sough can be reached on 703-308-0505. The fax phone numbers

for the organization where this application or proceeding is assigned are 703-305-0040

for regular communications and 703-305-0040 for After Final communications.
